# COM 244 LAB PROJECT

Project Name: Tic Tac Toe

Due Date: 25.05.2019

Scenario: This is a simple 2-D game will be played by keyboard.

You are expected to write a tic tac toe game with classic features. The game should include user interface. The players, the position to be moved and the game board must be visually indicated. An example is shown in the illustration above.

Requirements:
a-)This game will be implemented by Java.
b-) MVC structure should be used
c-) Use Case, Activity, Sequence and Class Diagrams are required for the system.
d-)Min 2 pages except the diagrams should be written in the report.
